

2008 Year end Report Kelso Street & Drainage As of 12-31-08

This is a combined division that maintains in excess of 64 miles of streets, 10 miles of improved alleys and 2 miles of unimproved alleys. Also, 50 plus miles of storm sewer ranging from 4" to 60" diameter, 1100 catch basins and approx. 400 manholes are maintained.

Accomplishments in 2008

Most days in January and February were spent sanding, plowing and chasing drainage issues caused by inclement weather. This included the cleaning of roadside ditches, culverts and catch basins.

At the end of February through April, the alley maintenance program was started and 6 alleys were graded, rocked and rolled. Trees in the right of way that cause traffic problems were also trimmed during that time. We continued cleaning ditches and catch basins on an as needed basis.

In May we continued cleaning catch basins and the grading of roadside shoulders. We also screened our sweeping piles and chipped the limbs that were cut earlier in the year. We also started patching asphalt streets with hot mix in various areas. Some time was spent with ground preparation work for the new maintenance building at the Operations Center on Parrott Way.

June was spent grinding old asphalt and paving with hot mix. Some time was spent cleaning catch basins as part of a continuing Engineering Storm Survey.

In July we continued our paving program. Time was also spent on our annual crack sealing program with approx. 4 miles of asphalt roads being sealed. Paving continued in August. Additional areas were crack sealed also.

During the course of the year the crew also:

- Responded to approx. 502 utility locates
- Completed 54 citizen concern requests
- Patched misc. potholes
- Repaired 7 catch basins
- Responded to 33 after hour call outs
- Prepped and paved various water/sewer utility cuts
- Assisted with the Street Inventory Condition Report
- Misc. vehicle maintenance
- Replace 100' of 36" drain line on Talley way
- Rocked and graded 6 Alleys
- Assisted with drainage install at 5th and Burcham

- Separation of debris piles at Kelso Airport
- Install drainage at 2102 Bloyd
- Crack seal at airport
- Replaced pipe at 8th and Church
- Grind and pave on 21st
- 10th and Harris drainage
- 10th and Harris pavement replacement
- Street sweeping and leaf removal
- Installed new drainage system @ 1000 N. 21st Ave.
