

Stormwater runoff is everyone's business.

**Does your business affect
stormwater runoff?**

**Is your business affected
by stormwater runoff?**

The answer to both is yes. It rains a lot in Longview. Rain washes over parking lots and lawns, picking up sediment, metals, grease, bacteria, and other pollutants.

Longview's storm sewer collects runoff and conveys it into Longview's ditches. This water is pumped untreated into the Cowlitz and Columbia Rivers.

Make your business a part of the solution to pollution:

- ✓ Keep your parking lot and catch basins clean.
- ✓ Report illicit discharges to the pollution hotline at 578-0900.
